

CLASS DIAGRAM

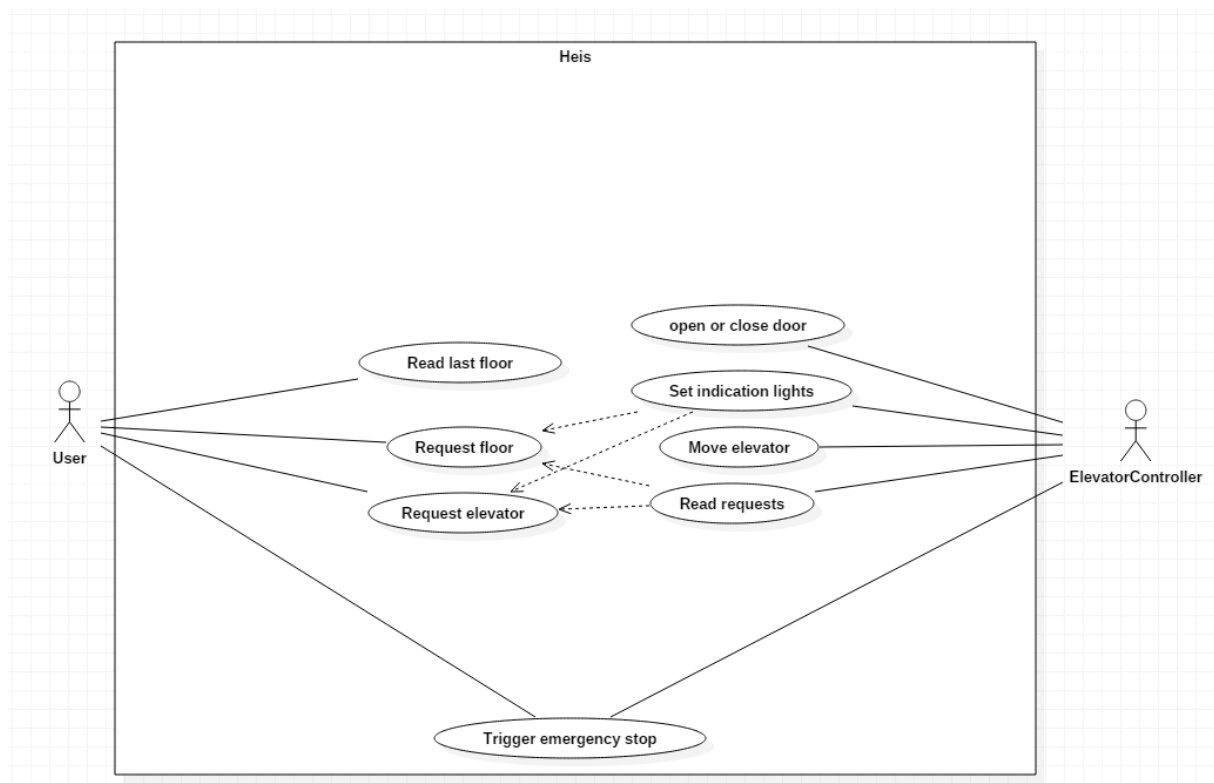

DESCRIPTION OF SEQUENCE DIAGRAM

- The scenario begins with the elevator being empty and standing still on the second floor with door open.
- A person summons elevator from the 1. floor indicating that she/he wants to go upward.
- After the elevator has arrived she orders transport to the 3. floor.
- The scenario ends when elevator arrives at the 3. floor and the door open.
- For simplicity we assume that no other persons interact with the system during this scenario.

DESCRIPTION OF USE-CASE DIAGRAM

- I. User request elevator.
- II. Elevator Controller reads requests.
- III. Elevator Controller sets indication lights.
- IV. Elevator Controller closes door.
- V. Elevator Controller moves elevator.
